_____	Elective _____		3		
			15		
	Total Degree Hours		60		

¹ Students who have not completed at least one 3 credit hour course in college-level finance, one 3 credit-hour course in college-level economics (i.e., 6 credit hours total) and earned at least a B in all courses taken must take HMP-504, Fundamentals of Economics and Finance as a prerequisite for HMP-520: Health Care Economics, and HMP-570: Health Care Finance. In addition, it is highly recommended that students, who have not taken economics or finance course work for four years or more, take HMP-504 the fall of their first year in the MHA program. In all these cases, HMP-542: Health Care Ethics should be taken in the second year in place of an elective.

² All MHA students must register for four semesters of HMP-591: Health Management Rounds. Although four presentations are given each semester, students are required to attend only three of these to receive a satisfactory grade.

³ **Internship:** All MHA students are required to complete a professional internship in health management during their course of study. Students must complete a minimum of 27 credit hours in the MHA curriculum and obtain the approval of the HMP Department Chair and MHA Program Director before enrolling in the internship program. Most health administration internships consist of a 13-week, full-time paid placement with a private health provider or other health care organization during the summer prior to each student's final year of academic course work. Placements are made by the HMP faculty that match each individual student's experience and career interests with the nature and preferences of available placement sites each year.
