

Evaluation and Analytics Coordinator (Job ID 0903916)
Child Health Advocacy and Outreach
St. Louis Children's Hospital

St. Louis Children's Hospital, recognized by *U.S. News & World Report* and *Parent Magazine* as one of America's best children's hospitals, seeks professionals for the position of Evaluation and Analytics Coordinator in the office of Child Health Advocacy and Outreach.

This position is responsible for developing, coordinating and implementing evaluation processes to ensure the effectiveness of advocacy and outreach programs. They will conduct literature reviews and appropriate analysis to identify validated evaluation tools and best practice models for programming. Familiarity with needs assessments, gap analysis, logic models, and clinical performance improvement processes is a plus. They will also assist in the planning and management of databases to ensure appropriate collection of data according to departmental goals.

Qualifications include a Bachelor's degree – an MPH or MSW (with research track) is preferred, or two years direct experience in evaluation of public health programs. The ideal candidate is proficient in collecting, interpreting and managing data in addition understanding evidence-based research and implementation of community-based programs.
