Baltimore, Maryland 21202

Job ID: 1022308

Job type: Full-time

Location: Baltimore, MD

Job Description

The Center for Biosecurity (Baltimore, MD) is looking to hire an Analyst. The position description and application instructions follow:

Description: The research analyst at the Center for Biosecurity provides support for mission-critical program work of the center through research and policy analysis and development. This position is located in Baltimore, MD. The incumbent is charged with: initiating, executing and responding to requests for center research and policy analysis; providing information and analysis to all center staff; serving as a member, and at times, project manager of project teams; producing original work in his/her field of expertise in order to contribute to the center's mission and its collective body of work; participating, as assigned, in the national and international dialogue on biosecurity issues through publication, presentations, and professional interactions; and participating in strategic planning.

Compensation: UPMC offers a competitive compensation and benefits package along with a strong growth-oriented working environment. We offer challenging projects and training to help ensure your success.

Qualifications: A master of arts, sciences or master of public health degree or equivalent related experience in biodefense, medicine, public health, science or public policy is required. Additional requirements include: experience working with multidisciplinary teams in a collegial setting; research, writing, or policy analysis and development experience in a scientific, public health, medical, technological, governmental or commercial context; excellent organization and time management skills; proficiency with personal computers, internet-based search methods, and appropriate office, database, research-related and/or statistical software; and familiarity with the operational life cycle of project management, including project planning and development, funding and staffing, day-to-day management, and produce delivery. Experience in one or more specialized biodefense, medicine, public health, science or public policy fields is preferred.

About the organization:

The University of Pittsburgh Medical Center (UPMC) is nationally recognized as a provider of state-of-the-art, progressive health care services. UPMC is western Pennsylvania's largest private employer and one of the largest medical centers in the nation. Year after year, UPMC is ranked for excellence by U.S. News & World Report.

How to apply: Apply online at www.upmc.com; click on Careers at UPMC, search openings, and enter 1022308 in the job opening ID field. UPMC is an equal opportunity employer.
