

Senior Manager, Health Services Research (Job ID 9092)

Express Scripts

St. Louis, MO

For more than a decade, Express Scripts has employed a company-paid research staff that provides timely, relevant and objective research to help improve the management of pharmacy benefits. Our award-winning work has appeared in peer-reviewed journals, reported in the national media and presented at professional conferences. If you would like to make a difference with an organization known for its leadership within the PBM industry, we have the challenge you seek. To learn more about Express Scripts' innovative research studies in pharmacy management visit: <http://www.express-scripts.com/industryresearch/outcomes/> and www.consumerology.org.

The successful candidate will write research proposals and protocols. Analyze and interpret the results of research projects. Develop internal reports and manuscripts to disseminate the results of research projects. Present findings and recommendations to internal and external audiences. Document, plan and track project tasks. Special projects as assigned.

Relocation benefits will be considered within the continental United States.

QUALIFICATIONS

DrSc, DrPH, or PhD in Health Policy, Decision Analysis, Epidemiology, or other health services research related field, with two (2) or more years of relevant experience; OR Masters in Public Health or Masters of Science in health services research related field and five (5) or more years experience of research experience in related area. Experience with the formulation and design of research proposals and research study protocols. Excellent statistical software programming skills (i.e., SAS, Stata, R) with experience in advanced statistical modeling techniques. Demonstrated ability to effectively communicate technical and other data to broad internal and external audiences. Exceptional communication (oral and written) and presentation skills.
