

Opportunities now available for Part-Time Employment & Internships

Who We Are

Transtria is a public health research and consulting company that strives to unite people, places and policies to revolutionize public health. We work with a variety of community organizations, universities, government agencies and foundations to provide knowledge and expertise in five core service areas: design & planning, intervention, technology, evaluation and translation.

Who We Are Looking For

Dynamic and motivated individuals pursuing a **Master's Degree** in a public health-related field (e.g., health education, behavioral science, health policy, epidemiology) with an interest in applying their skills and gaining practical experience in public health.

Applicants must have one or more of the following skills:

- Experience conducting literature searches
- Strong knowledge of research methodology
- Experience entering information into databases
- Experience conducting qualitative and quantitative data analyses
- Experience transcribing qualitative data
- Strong writing skills
